**The Original Million Mile Air Filter
Performance Air Intake Systems
Wrench-Off Premium Oil Filters**

9996496

"I drove a million miles on
one K&N air filter!"

- Carl Judice - New Iberia, Louisiana

See More of Carl's Story at
KNFilters.com/Million

REPLACEMENT AIR FILTERS

Available for Most Cars, Trucks, & Hybrids!

THEY DROP RIGHT INTO YOUR FACTORY AIR BOX IN 5 MINUTES AND WILL HELP YOUR CAR RUN BETTER.

- Designed to increase horsepower and acceleration
- Built to last for the life of your car
- Clean every 50,000 miles under normal highway driving conditions

Inventor of the Unique Cotton Air Filtration System

This is the original high-flow air filter invented by K&N. It is made with layers of woven cotton for a washable filter that offers low restriction and high air flow for your engine. For better performance and value over the life of your car, you cannot go wrong with our most popular product.

Never Replace Your Air Filter Again

Handmade in the USA using only the finest materials, K&N OE Replacement Air Filters are washable and backed by the World's First Million Mile Limited Warranty.

K&N POWERCUBE AIR FILTERS

Drop Right Into Your Factory Air Box!

Sometimes Thinking Out of the Box Means Thinking Inside the Box

Introducing our new line of POWERCUBE Air filters designed to replace an O/E flat panel filter with a 3-D oversized air filter that fits right into your factory air box. They fill otherwise empty space with a larger four sided air filter and when it comes to air filters, bigger is always better –

A lot better. The POWERCUBE has higher air flow and more dust holding capacity than even a K&N panel air filter. This oversized air filter provides dramatically more power than can be made available in a panel filter design.

Tests of individual part numbers. Airflow rates and differences will vary depending on part number, air filter size and OE application. Dust-free air flow tests performed on laboratory equipment. Test protocol available at knfilters.com.

CUSTOM AIR FILTERS & AIR CLEANER ASSEMBLIES

Custom, Specialty and Racing Air Filters

K&N offers over 1,500 different custom air filters in all shapes and sizes to meet your needs. They all feature our high-flow cotton medium and durable construction designed to be washed and reused. Because we have no idea where or how these filters will be used, they are not backed up by our Million Mile Limited Warranty. Instead, they are backed up by a One Year Limited Warranty.

Below are our most popular custom air filters. For more information or to see all our custom air filters, please visit KNFilters.com®.

Many More Custom Filters At KNFilters.com®!

K&N WRENCH-OFF OIL FILTERS

Originally developed for demanding race vehicles, our premium oil filter is rapidly becoming a favorite among consumers for its durability and easy removal.

- Filter nut makes installation and removal quick & easy
- Premium filter media captures 99% of harmful contaminants with low flow restriction
- Heavy gauge canister with leak proof double rolled seams
- Designed for higher burst strength & protection from road debris
- Specially designed for today's synthetic and extended service motor oils
- Durable enough to be used on dragsters that produce 5,000 HP!

WRENCH-OFF OIL FILTER™

CELLULOSE MEDIA TRAPS
99% OF HARMFUL PARTICLES

HIGH-FLOW DESIGN HELPS
REDUCE ENGINE DRAG

SPECIALLY DESIGNED FOR USE WITH TODAY'S
SYNTHETIC AND LONG-LIFE MOTOR OILS

Available for Most Cars, Motorcycles, & ATVs!

Our Oil Filters Have Nuts

We've all been there: Whether it's remembering where that disappearing canister tool is; having oil leak all over your garage and yourself; or finally giving up and pounding a screwdriver through the filter just to get it off. Most of our oil filters come with a nut welded to the top of the canister so they can be easily wrenched-off with a standard tool.

Heavy-Duty Construction for Extreme Conditions

To satisfy the demands of racers, our oil filter has many features over and above the requirements of most vehicles. We use thicker canister walls for extra strength and durability which reduces the risk of damage from loose rocks and debris. The heavy-duty construction will withstand higher oil pressures. The drilled hole in the nut is for a safety wire attachment. Required for many types of racing, the safety wire prevents blown oil filters from falling on the track and presenting a hazard to other race vehicles. This extra engineering offers peace of mind for consumers who want only the best.

K&N HIGH-FLOW INTAKE SYSTEMS

Look Up The Extra Horsepower Available For Your Car!

These systems are backed by our horsepower guarantee and we publish the power gains for each part on our web site based on multiple dynamometer tests.

Extend Your Cleaning Interval To 100,000 Miles

These systems come with such large air filters that they only require cleaning every 100,000 miles under normal highway driving conditions.

The Ultimate Power Upgrade!

Available with metal tubes or
HDPE tubes for that "O/E" look

A Complete Air Delivery System

These systems completely replace the restrictive factory air intake assembly with an aerodynamically engineered tube and an oversized conical air filter. Most systems come with a heat shield to isolate cool air taken in by the engine. They take about 90 minutes to install and deliver huge increases in power and acceleration that you will feel on your next drive. Offering up to 4 times more horsepower than from a K&N air filter alone, these are the systems that will make it seem like you have a different car!

Better Sound And Quality You Can Feel

You'll smile at your car's new sound. A K&N Intake System will make your car growl when under acceleration, yet stay quiet once at speed. You'll be thrilled when you feel the increased acceleration and horsepower. Plus you can feel confident knowing that your intake system is backed up by the best and largest aftermarket intake company in the World.

K&N Million Mile Limited Warranty®

Each intake system we sell is tested for durability and power improvement. From vibration stands to dynamometers, to over the road testing, we put our systems through rigorous requirements so we can back them up with our Million Mile Limited Warranty.

K&N HIGH-FLOW DIESEL AIR FILTERS & INTAKES

A diesel engine is a tough environment. Diesels create higher compression ratios and require tighter tolerances; that's why we build Diesel Air Filters to even higher specifications. They typically use deeper pleats in larger sizes to increase surface area for more capacity and air flow. They contain more cotton in different grades and configurations to achieve higher levels of efficiency. When you put a K&N Diesel Air Filter to work, you can feel confident that you've got a product specially designed and tested for your diesel's specific engine demands.

A DIFFERENT KIND OF AIR FILTER

Technology born on the race track and perfected in the laboratory is now available for your car.

K&N Invented a special low-restriction air filter that is washable and reusable. Instead of paper or synthetic materials, our high-flow air filters are made from multiple layers of specially treated cotton reinforced with coated aluminum screen. This natural filtering medium creates a powerful filter that breathes easier than paper and can be washed over and over.

MORE POWER

Allowing your engine to breathe easier can give your car extra horsepower and extra acceleration; extra power that can come in handy when you are getting onto a highway, pulling a trailer up hill, or passing another vehicle.

SAVE MONEY

Using a washable air filter can save you money in the long run. One K&N O/E Replacement Air Filter is far less money than replacing disposable air filters over and over again. Even better, they only require cleaning every 50,000 miles under normal highway driving conditions.

REDUCE WASTE/SAVE ENERGY

Long life products also save energy and reduce waste. There are over 100 million disposable air filters that are thrown away each year in the USA. This waste ends up in landfills or incinerators requiring new filters to be manufactured and repurchased by consumers over & over during the life of their car. At K&N, we only sell washable air filters, most of which will last for as long as you own your car.

Join the millions of consumers who have discovered K&N, an ecological alternative to disposable air filters, that improves horsepower and acceleration.
